

MOWN GRASS SITE SPECIFIC ACTIONS.

M2 Mill Common Sout

- (a) reduce area of close mown grass to 20-30m oval around goal and cut more frequently;
- (b) allow rest of area to revert to meadow but remove or mow out any noxious weeds before relaxing mowing regime;
- (c) undertake annual autumn cut of meadow area;
- (d) translocate or plant spring wildflowers on banks/margins;
- (e) extend existing hedge to N. to close gap and plant trees inside hedge to screen new housing across Limers Hill.

M3 Taddipport Bridge West

- (a) close mow area at E. end and plus footpath towards weir;
- (b) allow other marginal areas to grow on as meadow and cut once in autumn.

M4 Barley Grove (South)

- (a) continue closer mowing around picnic benches and bins;
- (b) allow meadow to grow on mound NE with autumn cut/clear;
- (c) translocate/plant spring wildflowers on banks and margins;
- (d) remove 3no. trees overhung by neighbours and plant new specimens to eventually replace mature specimens.

GRASSLAND & SCRUB SITE SPECIFIC ACTIONS.

G6 Station Path North + Limers Hill East

- (a) retain best individual trees (mainly oak) across area N of Station Path to grow on and remove remainder (c.50%);
- (b) plant narrow belt of native shrubs near A386 to screen traffic;
- (c) cut line of public footpath 4x per season to sustain route;
- (d) cut all three areas in the autumn and remove arisings;
- (e) treat linear area between Limers Hill and Woodland Val the same as area to sout

G7 Shepherds Ham

- (a) leave 3m uncut margins along narrow north and south sides;
- (b) cut meadow area once in June and again in September and remove arisings;
- (c) ensure bramble and scrub on riverside margin is cut back to avoid line of public footpath migrating into meadow area.

G8 Taddipport Bridge East

- (a) survey each year to assess species diversity;
- (b) continue with single late hay cut in autumn;
- (c) leave developing central reed area by overhead line uncut.

G9 Castle Hill East

- (a) prevent woody regeneration on N. side apart from wooded boundary margin beside adjacent housing;
- (b) cut areas of grass above 5cm in autumn and rake up cuttings to form compost/hibernation piles around edges.

WOODLAND SITE SPECIFIC ACTIONS.

W7 Rolle Wood West

- (a) thin saplings + young trees by favouring species other than sycamore which is already well established,
- (b) coppice etiolated saplings to each side of Tarka Trail bridge to give good clearance

W8 Rolle Wood East + Marshwood Hill

- (a) thin oak and fell or remove sycamore;
- (b) coppice elm near Coronation Path on basis of 1/7 per year.
- (c) sustain views from Monument Path and currently open section of Sliding Rock Path.

BRACKEN & SCRUB SITE SPECIFIC ACTIONS.

B4 Mill Common

- (a) remove sycamore, giving priority to higher ground and seed-bearing trees;
- (b) cut bracken of variable width below upper path and NE of recreation area to encourage grassland;
- (c) allow secondary woodland to establish opposite approved housing site by cutting bracken/bramble + planting trees.

B5 Castle Hill

- (a) control woody regeneration, especially sycamore, giving priority to higher elevations;
- (b) grub smaller sycamore and treat larger stumps with approved brushwood killer;
- (c) prevent encroachment of bracken/bramble on to paths or adjacent grassland by cutting hard back.
